**VITOCROSSAL 300**

## VITOCROSSAL 300

Gas condensing boiler  
4,7 to 60 kW

### 10 year guarantee

on stainless steel heat exchangers for oil  
or gas condensing boilers up to 150 kW

3.1

### Vitocrossal 300

#### Type CU3A

#### Gas condensing boiler for natural gas and LPG

With modulating MatriX gas burner and Lambda Pro Control  
Combustion controller

#### Permissible operating pressure 3 bar (0.3 MPa)

Product ID: CE-0085BN0570

- Seasonal central heating energy efficiency up to 94 % (H<sub>s</sub>) [gross cv] (label A)
- Stainless steel Inox-Crossal heat exchangers for efficient utilisation of condensing technology – self-cleaning effect through smooth stainless steel surfaces
- Modulating MatriX gas burner with a wide modulation range down to 20 % for particularly quiet, economical and environmentally responsible operation
- Lambda Pro Control combustion controller for all gas types – saves on costs by extending the inspection interval to 3 years
- Excellent controllability and reliable heat transfer through wide water galleries and large water content
- Easy to operate Vitotronic control unit with plain text and graphic display
- Balanced or open flue operation
- Web-enabled through Vitoconnect (accessories) for operation and service via Viessmann apps

# VITOCROSSAL 300

## Heating system

## Control unit

- 1 heating circuit without mixer
- 1 or 2 heating circuits with mixer

### Vitotronic 200 Type KW6B, for weather-compensated operation

With control unit for one heating circuit without mixer and two heating circuits with mixer.

- Weather-compensated, digital boiler and heating circuit control unit
- With digital time switch with individual day and seven-day program
- With separately adjustable time periods, heating curves, set temperatures and heating programs
- With cylinder temperature controller and sensor
- With integral diagnostic system and additional functions

An extension is required for each **heating circuit with mixer**:

#### Mixer extension kit (mixer mounting)

Part no. ZK02940 Euro 652,- MG W

#### Mixer extension kit (wall mounting)

Part no. ZK02941 Euro 428,- MG W

3.1

The boilers are preset for natural gas. Conversion within gas groups E/LL is not required. The conversion to LPG is made at the gas solenoid valve and the control unit (a conversion kit is therefore not required).

With the internal H1 extension, an external safety solenoid valve can also be connected. To interlock an external extractor, the internal H2 extension (part no. 7436477) is required instead of the internal H1 extension (part no. 7436476).

Standard delivery:

- Boiler body with thermal insulation
- Boiler control unit
- Modulating MatriX gas burner with Lambda Pro Control combustion controller for open flue or room sealed operation
- Boiler flue connection
- Fully wired

#### Notes:

Gas shut-off valve with thermally activated safety shut-off valve must also be ordered; see "Accessories".

3.1

**Notes:**

According to TRF 1996, Vol. 2 – valid as of 1 September 1997 – an external safety solenoid valve is no longer required when installing the appliance below ground level. However, the high safety standard derived from the use of an external safety solenoid valve has proved to be valuable. We therefore recommend the continued installation of an external safety solenoid valve when installing the appliance below ground level.

**Notes:**

For further accessories and software, see the following Registers:

- ▶ Register 11, Connectivity and Home & Building Automation (ViCare app, Vitoconnect, Vitogate, etc.)
- ▶ Register 11, Control unit accessories (remote controls, sensors, etc.)
